SOFT SIGNAL / BRAND GUIDELINES / 1.0

Good work. Easy conversation.

A little less noise.
A lot more human.

A familiar face.
A clear conversation.

Primary: Forest on Paper or Porcelain

Reverse: Paper on Deep Forest

Horizontal: 120 px minimum. Stacked: 96 px.
Symbol: 24 px. Reduced-detail favicon: 16-23 px.

Give the mark its space.

Leave at least one quarter of the symbol's ink width around every side. Preserve proportions, lettering and spacing. Use the supplied SVG; do not retype, stretch, tilt or add effects.

Grounded in green. Warmed by paper.

Meet Moss.

A gentle, awake companion. Keep the sage body, cream face, dark eye patches, peach cheeks, three cream claws and tactile paper material consistent.

Small wins and milestones

Use at 160–320 px for onboarding, 96–160 px for compact empty states. Keep the full silhouette and transparent margins. PNG masters and full-size / 512 / 256 px WebP files are included.

Pair Moss with a clear message and useful next step. Keep the mascot out of dense work areas and serious error states. Use the simple logo symbol at small sizes.

Conversation grows here.

Large, organic, tactile.

Layered cut paper. Speech-bubble leaves. Gentle curved branches. A small Apricot accent.

Keep texture in artwork and clean surfaces in UI. Place live text beside the illustration. Stack the whole scene below the headline on mobile.

Hero master: 1536 × 1024.
WebP: 480, 960 and 1536 px wide.
Repeating vector pattern: 480 × 320.

Use the pattern as a quiet accent on covers and decorative areas. Keep it away from reading text, forms and message transcripts. Do not stretch or recolor the raster master.

Clarity in every state.

Light interface

Forest content. Porcelain surface. Quiet dividers.

Make it useful.

Visible field labels. Clear recovery text. Underlined inline links. Native keyboard order. 3 px focus outline with a 3 px offset on tested page/surface fills.

Keep it calm.

120 / 160 / 240 ms motion. Honor reduced motion. No looping character animations in work areas. Use DM Sans for messages and controls.

Styles: fonts.css → tokens.css → optional components.css. System appearance by default; set data-lazy-theme="light" or "dark" on the root for an explicit theme.

Warm. Direct. Useful.

Your people.
Easy conversation.

Say “Message your team.”
Say “You’re all caught up.”
Say “Try again. Your draft is saved.” only where that behavior is guaranteed.

Keep jokes out of errors. Name the next action. Describe real features and supported platforms. The product is Lazy; Soft Signal is the internal direction name.
